

Mental health and addiction staff have your say

Ngā Poutama Oranga Hinengaro: Quality in Context is a new national survey to help improve the quality of mental health and addiction services.

By taking part in the anonymous 10-minute survey, you can help the sector learn what is working well, and where improvements can be made.

In recognition of your time, you will be able to enter a draw for one of three team morning tea shouts!*

Please help us with this important piece of work, and encourage your colleagues to take part.

*Your entry into the draw will be stored separately from your responses to the survey questions, which will be anonymous.

Q&As:

Is this survey for me?

This survey is for everyone who works in mental health and addiction services, including support workers, consumer advisors, house officers, psychiatrists, administrators etc.

How can I participate?

The survey is live for the month of August. It will be emailed to all MHA staff in DHBs, NGOs and PHOs early this month.

You can also access the survey at www.qualityincontext.nz

How will the results be used?

The survey findings will be shared with the sector, and used to design quality improvement initiatives that make a difference for tāngata whaiora/consumers and staff.

Results will be combined so individuals, and organisations with a small number of staff, are not identifiable.

If you have any questions or have not received your email
