

Nga Purei Whakataa Ruamano Regionalisation & Managed Networks Notes

- Midland MH&A and some other regional services have merged into a shared agency HealthShare
- Over time this may reduce the number of GMs, CEs and other roles in the future and the intention is monies will be put back into services
- Probable shift in funding from existing services into primary mental health so also possible reduction of services, need to look at how this will work for Maori and does a primary model work?
- Reporting lines for Midland MH&A will be directly to the CEs and HealthShare board
- Mental Health regional contracts will all come under Midland MH&A for monitoring and analyzing of data which will be sent out to the sector

Managed Network

- Nga Purei is currently an informational network, we are looking at moving this forum into a managed network to provide advice from a Maori perspective on strategic objectives in regional plans and workforce opportunities eg. Takarangi
- Future agenda's will be changing to include regional and national strategic documents its imperative the right people are sitting at the table representing Maori health issues
- The implementation of core business is important for Nga Purei to be a part of giving voice and strategic advice to ministerial documents
- Snooze or lose, need to be a lot more proactive and involved at a local level and mindful what is happening nationally and consider how this is done in a regional services
- Imperative to have a managed approach as we currently have inconsistent attendance with different people at the table at each meeting some that are not decision makers
- Need to ensure when work is to be done that this "gets done" efficiently

Terms of Reference

- This is very clear regarding representation of three persons per rohe – three voting rights
- Clear representatives are to be chosen via local Maori Advisory groups

EOI Process

- The other Midland regional forums will be entering into an EOI process to ensure we have the right people at the table
